SECUMAX CARDYCUT

NO. 00546912

Original size

Safety for all and for everything

The injected and concealed blade does not come close, either to you or to your goods. In other words, you only cut what you really want to cut.

Singularly good

The SECUMAX CARDYCUT is a disposable knife. Since you do not have to change the blade, neither you nor your staff can come into contact with it. An additional benefit as far as safety is concerned.

Blade right at the front

The SECUMAX CARDYCUT comes right to the point, since the blade starts right at the front. The narrow gap between the blade and plastic guides the cutting material. Both enhance control when cutting.

No rust

Your cutting tool is fitted with a stainless steel quality blade. The TiN coating ensures that you can cut easily and more effectively for longer with your SECUMAX CARDYCUT.

Ideally placed

You won't misplace the SECUMAX CARDYCUT so easily. The safety knife is equipped with an eyelet so it can be kept in an easy to find place.

Ventures where others won't. Transparent and stainless steel.

You will always gain insight with the SECUMAX CARDYCUT since it is made of plastic that is clear as glass. This makes visual control easier when cutting film and paper. Thanks to its small and compact design, it runs very smoothly, for example, when cutting into curves and in especially narrow slits. As a specialist for thin single-layer film it is used frequently in the automobile industry.

PRODUCT FEATURES

Technical features

	Maximum safety		Disposable knife
	Ergonomic		Cutting depth
	For right and left handers		Stainless
